

Big Data Assignment

Assignment Type: Artificial Intelligence Review Paper

Proposed Title: Big Data with Machine Learning: A Review

Review Period: 2025–2027

Keywords: Machine Learning, Big Data

Papers to Be Reviewed: The review paper will include at least 20 research papers selected from the following four journals/platforms:

1. **IEEE Transactions on Big Data**
2. **Big Data Research**
3. **Journal of Big Data**
4. **Artificial Intelligence Review**

Approximately 3–5 research papers will be selected from each source.

Total Number of Papers: At least 20 papers

Paper Selection Criteria: The selected research papers will be chosen based on the following criteria:

- Relevance to **Big Data and Machine Learning**
- Published during the **2025–2027** review period
- Preferably indexed in **Web of Science**
- Preferably published in **high-impact journals**.

Paper Format and Structure

The final review paper will follow the publication format and structure of Artificial Intelligence Review.

The paper will be developed as a proper literature review, focusing on synthesizing, comparing, and critically analyzing the selected research papers rather than simply summarizing each paper individually.

The main components of the review paper will include:

1. **Abstract**
2. **Introduction**
3. **Literature Review**
4. **Tables and Figures**
5. **Conclusion**
6. **References**

The formatting, organization, citation style, and overall presentation will be aligned with the requirements of Artificial Intelligence Review.

Marks Distribution

Component	Marks
Abstract	2%
Introduction	3%
Literature Review	10%
Tables and Figures	3%
Conclusion	2%
Formatting	2%
References	3%
Total	25%

Submission Information:

- **Deadline:** September 27, 2026
- **Group Size:** Maximum 10 members
- **Assignment Weight:** 25%
